

Hello, I am Michael Clavelli, supporter of XM satellite radio.
I have recently become aware of the NAB (National Association of Broadcasters) and their efforts to curb content offered by satellite radio, such as instant traffic and weather updates for my local area.

I do not feel XM Radio has done anything wrong and I believe HR 4026 diminishes freedoms that have been practiced for many years. I especially believe this proposition is folly considering that satellite radio is a service that I have to subscribe to, just like cable television.

I urge you to do what you can to disallow the NAB from having their way.

Thank you for your time.
Michael P. Clavelli
